Darcie Richardson, MA
The Faces Project:
Looking Glass Reflections Through Our Many Selves

Darcie Richardson is a Ph.D. candidate of the Pacifica Graduate Institute where she received her MA in Depth Psychology with an emphasis in Somatics in 2012. She has been exploring the healing nature of imagery through dreams, active imagination, and daily life experience. Over the

past two years, the faces that arise through the mirror technique she is developing have captivated her interest to such a degree, she has decided The Faces Project is her dissertation topic. Before she attended Pacifica Graduate Institute, Darcie practiced as a community mediator helping resolve disputes between neighbors, family, workplace and the elder community. She feels that her work with conflict has transitioned from outer world relationships and incongruities to working with inner world figures and imagery.
